

University Echahid Hamma Lakhdar of EL-OUED

**Faculty of Exact Sciences
Department of Material
Sciences**

**Thesis
Presented to obtain the degree of
doctorate
Specialty: Radiation, matter and energy**

SUBJECT OF THE THESIS:

Study and elaboration of Fe/Li - doped SnO₂ thin films

Presented by:

M^{me}: SEGUENI leila

Publicly defended on: 19/02/2020

To the jury composed by :

Mr. El habib GUEDDA	Professor	University of El-Oued	President
Mr. Mohamed Sadok MAHBOUB	MCA	University of El-Oued	Examiner
Mr. Abdelouahad CHALA	Professor	University of Biskra	Examiner
Mr. Saad RAHMANE	Professor	University of Biskra	Examiner
Mr. Rachid GHERIANI	Professor	University of Ouargla	Examiner
Mr. Boubaker. BENHOUA	Professor	University of El-Oued	Thesis Director

CONTENTS

TABLE OF CONTENTS

Table of contents.....	I
List of Figures.....	IV
List of Tables	VI
Abbreviations.....	VII
General Introduction.....	1

CHAPTER I: BIBLIOGRAPHIC STUDY

I.1 Transparent conductive oxides TCOs	8
I.1.1 Electrical properties	10
I.1.2 Optical properties.....	10
I.1.3 Optical Gap Shift	12
I.1.4 Electrical structure of TCOs	13
I.1.5 Interconnected relationship between electrical and optical properties	14
I.2 SnO ₂ properties.....	15
I.2.1 Crystal structure	15
I.2.2 Physical properties	16
I.2.2.1 Band structure	16
I.2.2.2 Transport properties	17
I.2.3 Magnetic properties	18
I.3 Deposition methods	18
I.4 Conclusion	19
References	20

CHAPTER II: EXPERIMENTAL WORK AND CHARACTERIZATION TECHNIQUES

II.1 Thin films deposition	29
----------------------------------	----

II.1.1 Substrates.....	29
II.1.2 Spray Pyrolysis	29
II.2. Experimental work	31
II.2.1 Solutions and thin films preparation (Fe-doped SnO ₂ 0-10wt.%).....	31
II.2.2 Solutions and thin films preparation (Fe-doped SnO ₂ 0-0.6 wt.%).....	31
II.2.3 Solutions and thin films preparation (Li-doped SnO ₂ 0-10 wt.%)	32
II.3 Characterization	32
II.3.1 X-ray diffraction	32
II.3.1.1 Scherrer equation	34
II.3.1.2 Williamson-Hall ways	34
II.3.2 FT-IR Analysis	35
II.3.3 Scanning electron microscopy (SEM).....	36
II.3.4 Optical characterization via UV-Visible spectrophotometry	36
II.3.4.1 Optical transmittance	36
II.3.5 Four-point probe and Hall-effect measurements	37
II.3.5.1 Used Equations	38
II.4 Conclusion	38
References.....	39

CHAPTER III: IRON DOPING SnO₂ THIN FILMS

III.1 Effect of precursors natural SnCl ₂ and SnCl ₄	41
III.1.1 Structural properties	41
III.1.2 Thin films transmittance upon natural of precursors	42
III.2 Fe-doped SnO ₂ thin films (0-10wt.%)	44
III.2.1 Structural properties	44
III.2.1.1 Microstructural studies	44

III.2.1.2 Surface morphological studies.....	49
III.2.1.3 Elemental composition studies	51
III.2.2 FT-IR studies.....	53
III.2.3 Optical properties	54
III.2.4 Electrical properties.....	57
III.2.4.1 Sheet resistance (R_{sh}).....	57
III.2.4.2 Hall effect	58
III.3 Fe low doping levels (0.2-0.6wt.%).....	60
III.3.1 Structural studies	60
III.3.2 Optical studies	62
III.3.3 Electrical studies	64
III.4 Conclusion	65
References.....	67

CHAPTER IV: Li DOPED SnO₂ THIN FILMS

IV.1 Li-doped SnO ₂ thin films (0-10 wt.%)	71
IV.1.1 Structural studies.....	71
IV.1.2 Optical studies.....	74
IV.1.3 Electrical studies	75
IV.1.3.1 Sheet Resistance (R_{sh}), carrier type and carrier concentration.....	75
IV.2 Application	77
IV.3 Conclusion.....	78
References.....	79
General Conclusion	80
