THESIS

SUBMITTED TO OBTAIN 3rd CYCLE LMD DOCTORATE DEGREE IN
CHEMISTRY

Speciality: Pharmacochemistry of active substances of biological
interest

THEME

Evaluation of the pharmacological effects of *Atriplex halimus* L. aqueous
extract against pathophysiological alterations induced by Benzene and
Sodium benzoate (food additive): Experimental study in rats.

Presented by: ZEGHIB Khaoula

Jury Members:

President:	Dr. REBIAI Abdelkrim	University of El-Oued
Supervisor:	Dr. DJAHRA Ali Boutlelis	University of El-Oued
Examiner:	Pr. ROUABHI Rachid	University of Tébessa
Examiner:	Pr. SALHI Nasrine	University of Ouargla
Examiner:	Dr. DEROUICHE Samir	University of El-Oued
Examiner:	Dr. KHELEF Abdelhamid	University of El-Oued

- 2019/2020 -

TABLE OF CONTENTS

Introduction	
FIRST PART: LITERATURE REVIEW	
CHAPTER I: Benzene	
1. Identification.....	3
2. Physical and chemical properties	3
3. Production and uses	4
4. Sources of benzene exposure	5
5. Toxicokinetics	5
5.1. Absorption.....	5
5.2. Distribution.....	6
5.3. Metabolism.....	6
5.4. Elimination.....	7
6. Toxicity.....	8
7. Toxicity Mechanism.....	9
7.1. Benzene Metabolites.....	9
7.2. Oxidative stress	10
7.2.1. Definition.....	10
7.2.2. Free radicals.....	11
7.2.3. Antioxidants.....	11
7.2.4. Benzene and oxidative stress.....	12
CHAPTER II: Sodium benzoate	
1. Identification.....	14
2. Physical and chemical properties	14
3. Production and uses	15
4. Metabolism.....	16
5. Toxicity.....	17
6. Sodium benzoate and benzene.....	18
CHAPTER III: <i>Atriplex halimus</i>	
1. Identification.....	20
2. Botanical characteristics	20
3. Geographical distribution and habitat	21
4. Bioactive compounds.....	22
5. Uses.....	23

5.1. Traditional medicine and modern pharmacology	23
5.2. Livestock feed.....	23
5.3. Human nutrition.....	24
SECOND PART: EXPERIMENTAL PART	
CHAPTER I: Materials and methods	
1. Materials.....	25
1.1. Plant material.....	25
1.1.2. Preparation of aqueous extract	25
1.2. Animals	25
1.2.1. Animals and maintenance.....	25
1.2.2. Experimental design	26
1.2.3. Samples preparation.....	27
1.2.3.1. Sacrifices and Blood collection	27
1.2.3.2. Preparation of tissues samples.....	27
1.2.3.3. Bone Marrow Sampling	27
2. Methods.....	29
2.1. Phytochemical investigation of aqueous extracts of <i>Atriplex halimus</i> L.....	29
2.1.1. Extraction yield	29
2.1.2. Phytochemical Screening.....	29
2.1.2.1. Polyphenols.....	29
2.1.2.2. Sterols, steroids and terpenes.....	29
2.1.2.3. Carotenoids	29
2.1.2.4. Flavonoids	29
2.1.2.5. Anthocyanins.....	30
2.1.2.6. Tannins.....	30
2.1.2.7. Alkaloids	30
2.1.2.8. Saponins	30
2.1.2.9. Cardiac glycosides	30
2.1.2.10. Mucilage	30
2.1.2.11. Coumarins	31
2.1.3. Quantification of phytochemical compounds	31
2.1.3.1. Estimation of total phenolic.....	31
2.1.3.2. Estimation of total flavonoids.....	31
2.1.3.3. Estimation of condensed tannin.....	31

2.1.3.4. Estimation of total Saponin content.....	31
2.1.4. Characterization of <i>Atriplex halimus</i> L aqueous Extract by Fourier Transforms Infrared (FTIR).....	32
2.1.5. Quantification of phenolic and vitaminic compounds by LC-MS techniques.....	32
2.2. <i>In vitro</i> antioxidant activity.....	32
2.2.1. DPPH free-radical scavenging activity.....	32
2.2.2. Hydroxyl radical scavenging activity.....	33
2.2.3. Ferric reducing antioxidant power (FRAP assay)	33
2.3. <i>In vivo</i> study.....	34
2.3.1. Acute toxicity study.....	34
2.3.2. Evaluation of preventive and curative effects of <i>A. halimus</i> on benzene and sodium benzoate.....	34
2.3.2.1. Determination of Benzene Concentration Using GC Method.....	34
2.3.2.2. Determination of phenol and Hydroquinone using HPLC Method.....	35
2.3.2.3. Haematological parameters analysis.....	36
2.3.2.4. Biochemical parameters analysis.....	36
2.3.2.4.1. Alanine aminotransferase.....	36
2.3.2.4.2. Aspartate aminotransferase.....	36
2.3.2.4.3. Alkaline phosphatase.....	37
2.3.2.4.4. Lactate dehydrogenase.....	37
2.3.2.4.5. Calcium.....	37
2.3.2.4.6. Albumin.....	37
2.3.2.4.7. Total protein.....	37
2.3.2.4.8. Urea.....	37
2.3.2.4.9. Creatinine.....	38
2.3.2.4.10. Uric acid.....	38
2.3.2.5. Oxidative stress parameters.....	38
2.3.2.5.1. Preparation of homogenates	38
2.3.2.5.2. Determination of protein level.....	38
2.3.2.5.3. Determination of Malondialdehyde level.....	39
2.3.2.5.4. Determination of reduced glutathione level.....	39
2.3.2.5.5. Determination of Glutathione-S-transferase activity.....	40
2.3.2.5.6. Determination of Catalase activity.....	40
2.3.2.6. Cytological examination.....	40

2.3.2.7. Histopathological study.....	41
2.4. Statistical analysis.....	41
CHAPTER II: Results	
1. Phytochemical study of aqueous extracts of <i>Atriplex halimus</i> L	42
1.1. Extraction yield.....	42
1.2. Phytochemical Screening.....	42
1.3. Quantification of phytochemical compounds.....	42
1.4. Characterization of aqueous extract of <i>A. halimus</i> by Fourier Transform Infrared (FTIR)	43
1.5. HPLC-MS of phenolic and vitaminic compounds of aqueous extract of <i>A. halimus</i>	44
2. In <i>vitro</i> antioxidant capacity.....	45
3. In <i>vivo</i> study.....	46
3.1. Acute toxicity study.....	46
3.2. Preventive and curative effects of <i>A. halimus</i> on benzene and sodium benzoate....	46
3.2.1. Body weight gain, and relative kidney and liver weight.....	46
3.2.2. Determination of Benzene Concentrations Using GC Method.....	47
3.2.3. Determination of Phenol and Hydroquinone in Rat bone marrow.....	49
3.2.4. Hematological parameters.....	50
3.2.5. Cytological Evaluation.....	52
3.2.6. Biochemical parameters.....	56
3.2.7. Oxidative stress parameters.....	57
3.2.8. Histopathological studies.....	61
CHAPTER III: Discussion	
Discussion.....	75
Conclusion and perspectives	85
References	87
